### **Helpful Tips for This Painting**

1. Outline everything in yellow paint. This is a light color that will allow you to keep your lines, while being easily covered with your chosen color.
2. Paint the boxes and the shoe.
3. Once everything is dry, fill in your background.
4. Once everything is dry, add the pearls by making small circles.
5. Make sure to clean out your brushes with warm water to keep the paint from drying out the brush between colors. Also, wipe off your brushes between colors so that the colors don't mix.
6. Use your darker colors like black and brown last. They are much harder to cover up than the lighter

## **COLOR MIXING TIPS**

It is up to you to make your painting unique so you can mix any colors together that you like. Below are some helpful color combinations.

Yellow + Blue = Green

Red + White = Pink

Black + White = Grey

Red + Blue = Purple

Red + Yellow = Orange
